

CL120 Switched Dusk-to-Dawn Auxiliary Power

The Series CL120 Auxiliary Power Adapter works with any fixture that utilizes a photocontrol and twist-lock type receptacle. The CL120 turns the luminaire and the auxiliary power on at dusk and off at dawn.

This Power Adapter is ideal for holiday lighting by easily providing power without the need for any additional wiring.

The standard model works well with HID luminaires while our enhanced version is designed for the newer LED streetlights.

Ordering Information

Model	Line Voltage	Load
CL120	105-130 VAC	1800VA for HID Luminaires
CL120-ELL	105-130 VAC	6.5A for LED Luminaires
Note: 2 ft. lead length standard with 3 prong female connection at the cable end		
Note: Output voltage not grounded		

FP285A Timed & Switched Dusk to Dawn Auxiliary Power Adapters

The Series FP285A Auxiliary Power Adapter works with any luminaire that utilizes a photocontrol and twist-lock type receptacle. The FP285A turns the luminaire and the auxiliary power on at dusk. It then turns the auxiliary power off at midnight and turns the luminaire off at dawn. The FP285A provides a convenient weatherproof outlet with cover.

Ordering Information

Model	Line Voltage	Load
FP285A	105-130 VAC	8.3A / 1000W (timed power)
FP285A-7 (7-pin)	105-130 VAC	8.3A / 1000W (timed power)
FP285A-CP	105-130 VAC	8.3A / 1000W (constant power)
FP285A-CP-7 (7-pin)	105-130 VAC	8.3A / 1000W (constant power)
Note: Output voltage not grounded		

Pass Through Spacer for Decorative Fixtures

When you need to add height to your photocontrol, the FPS284 Spacer is ideal for raising the bar. This spacer will add around 2.5" and is available in both a 3-pin and 7-pin version.

Ordering Information

Model	Line Voltage	Load
FPS284	120-480VAC	3 Pin Spacer
FPS284-7	120-480VAC	7 Pin Spacer
